

Surname Index - Plot Number - Grid Location - 6th November 2017

- NAMES in BLACK** - Original A-Z list of known occupants – listed in cemetery book – headstone.
- NAMES in BLUE** - Known individuals, located through funeral notices in ‘Papers Past’.
Available dates only go up to 1945
- NAMES in ORANGE** - Individuals located in ‘Papers Past’, for whom a cemetery plot is not listed and for whom there is no headstone listing in the cemetery’s record book.
Available dates in ‘Papers Past’ only go up to 1945
- NAMES in RED** - are links between Maiden and Married names. (Four pages of 1918-1977 records)

As of 2016, funeral notices can only be accessed in ‘Papers Past’ up to 1945.

There remains a gap until 1965, when a survey resulted in the cemetery’s record book, held at Battersby’s Funeral Services, in Avondale Shopping Centre, West Auckland.

Funeral notices occasionally showed confusion between Avondale’s Anglican & Presbyterian Cemeteries.

Current search results list about 280 funeral notices for known individuals and about 85 notices for previously unknown individuals – several of whom are related to existing families.

These 85 help to explain the 60 extra plots, recorded in a 2013 ground resonance scan.

This document is a ‘work in progress’.

There is a NZ Herald public notice - April 27th 1963, listing headstones which needed work to improve safety, or laying flat, or removal.

A transcript of this list is added at the end of this document.

Plot locations and grid references are located in the JPEG folder, leading to MAPS.

Charles Richard 84 Widower of Florence Jessie	1945 10 17	(bur. Fri 19 th Oct)	Plot could be 169
Florence Jessie 46 Wife of Charles Richard	1927 05 02	(bur. Tue 3 rd May)	Plot could be 168
(née SAUNDERS)			
Thomas Henry 14 Son of Charles & Florence	1921 11 28	(bur. Wed 30 th Nov)	Plot could be 186E
Charles Trevor 6y 8m Son of Charles & Flor.	1922 07 25		Plot could be 185E

Based on the 2013 magnetic resonance scan, four bodies were identified in the row containing plot 185E.

Interpretation by Dr. Hans-Deiter BADER (Blockhouse Bay) provided the following, without knowing the circumstances of these plots :

Plot 168 Adult form - Been in ground a long time
 Plot 169 Adult form - More recent than Plot 168
 Plot 185E Small form - Buried closely to Plot 168
 Plot 186E Larger than 185E - but not quite average adult size - Slight separation from Plot 168

This information has given rise to the following guesses for the FOSTER family

Plot 168 Florence Jessie (Mother, buried in 1927)
 Plot 169 Charles Richard (Father, buried in 1945)
 Plot 185E Charles Trevor (6 year-old son, in 1922, buried close to where mother would lie in 1927)
 Plot 186E Thomas Henry (14 year-old son, buried in 1921)

McMILLAN Ian / Rose * see following note	32E	D 4

McMILNE Ian Neil 15m 1930 09 05 (bur. Sun 7th Sep) Plot likely to be 32E
2nd Son of Roy Alexander & Florence. Brother of Edith, Roy and Elva

McMILNE Rose 2y Dau. of Roy Alex. & Flor. 1914 11 -- Plot likely to be 32E NZ BDM says 1913
The funeral notice was printed in the Auckland Star, 17th Nov 1914, page 12.

McMILNE Joseph 5h Son of Roy Alex. & Flor. 1917 Plot likely to be 32E
Have never located a funeral notice for Joseph. Best clues are from the family and NZ BDM.

* Note on Plot 32E :

McMILLAN Ian / Rose 32E D 4

During 2011, a search for an “Ian McMilne” in Avondale led to plot 32E. The similarity in names was further highlighted by a second entry in this plot – “Rose”. The family were also looking for “Rosie”. While there is currently no firm confirmation of identities, the two names together and the very similar-sounding surnames are the best guess at present.

Plot 32E has no headstone and the official record book gives only two first names and the surname. Death certificates have shown three young deaths in the same family – Rose in 1913, Joseph in 1917 and Ian in 1930 – all associated with Avondale – so there may be a third occupant of plot 32E. The three McMilne children are the only ones listed By NZ’s BDM on the internet from 1860-2000.

The magnetic resonance scan of 2013 identified three small forms, buried sideways across the single plot.
